Put your members, guests, family and employees at ease
with Electrostatic Disinfectant Coat & Cover Service:

- This service consists of the electrostatic application of Micro Germ Defense, an EPA-registered, FDA-Approved Antimicrobial coating that prevents and controls the development and transfer of bacteria, viruses (including the COVID-19 surrogate), influenza, MRSA, mold, fungus, yeast and algae.
- Micro Germ Defense is 99.99% effective at eradicating COVID-19 surrogate for a minimum of 30 days.
- All of our technicians have been trained, certified, and are licensed and bonded.

Our cleaning solution is registered EPA # 10324-166-40672
